

## EXPERIMENT-3

**AIM:** TO ADD HEADER, FOOTER AND CSS TO EXISTING HOMEPAGE.

### HEADER:

The <header> element represents a container for introductory content or a set of navigational links.

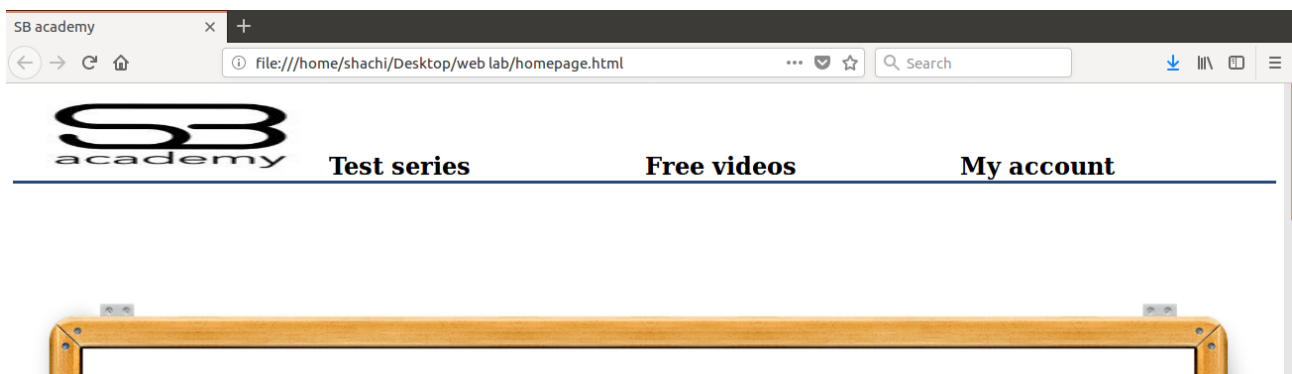

A <header> element typically contains:

- one or more heading elements (<h1> - <h6>)
- logo or icon
- authorship information

You can have several <header> elements in one document.

```
<header>

<h2 id="head">Test series</h2>
<h2 id="head">Free videos</h2>
<h2 id="head">My account</h2>
</header>
```

## **FOOTER:**

The <footer> tag defines a footer for a document or section.

A <footer> element should contain information about its containing element.

A <footer> element typically contains:

- authorship information
- copyright information
- contact information
- sitemap
- back to top links
- related documents

You can have several <footer> elements in one document.

```
<footer>

  <h2 id="foot">Contact info:</br>New Delhi India </br>+91 9876543210</br>abc.123@sbacademy.com</h2>
</footer>
```

**Contact info:**  
**New Delhi India**  
**+91 9876543210**  
**abc.123@sbacademy.com**

## CSS:

CSS is a language that describes the style of an HTML document.

CSS describes how HTML elements should be displayed.
